

Universal Stab Kit (USK)

Shop Tool Company's answer to the industry standard link arm style stab kit. Includes flat, round, and pin stabs as well as a hardware kit in a fitted Storm case and the wrenches needed to bolt everything together.

\$5600

USK Custom Fitted Case Foam

USK Stabs

In addition to the USK we also offer the following breaker specific stab kits:

WL

Purpose-built stab kit for the WL-1, WL-2, and WL-3 draw out breaker finger clusters. The WL kit ships in a small Storm case. Can be used with the USK or stand alone in other configurations.

\$1200

WL Kit

MasterPact (MP)

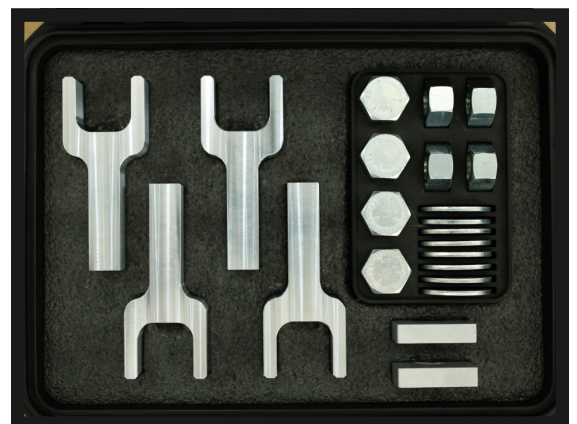

Tuning fork shaped stabs for the double-row finger clusters on the MasterPact NW breaker. Link arms are included for double stack clusters that bolt the stabs together with the correct spacing. A hardware kit is included in a small Storm case. Designed to be used stand alone or with the USK.

\$1200

LS UL (LS)

Visually nearly identical to the MasterPact kit with different dimensions for the LS UL breakers.

\$1200

MP Kit (LS looks similar)

Cam Clamp (CC)

This kit uses a lever clamp and a pivot block for making quick, repeatable connections to stub bus connections. The kit includes a full set of pivot blocks and necessary hardware for connecting to common nominal sizes found in circuit breaker testing. The kit includes two Cam Clamp stabs, the pivot block hardware kit, and a T-handle hex wrench in a fitted Storm case.

I-Line Cam Clamp (ILCC)

Single cam lever operation to quickly connect a high current test set to the venerable I-Line panel bus for testing breakers in situ. This is typically used during maintenance testing where speed is important. One I-Line Cam Clamp stab is included in a custom fitted Storm case
